Anup Ramesh Bhagat

Data Analyst | Data Scientist

Berlin, Germany | **+49 176 29979288** | linkedin.com/in/-anup-bhagat- | anupbhagat5080@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience turning enterprise data into dashboards, KPI reporting and business decisions, plus working-student experience as a Data Scientist / Data Engineer building **machine learning** models, **LLM-based workflows** and validated **data pipelines**. Strong in **SQL**, **Python**, Power BI and statistics, with a consistent focus on data quality and clear communication with business and technical stakeholders. B.Sc. Mathematics & Statistics; completing an M.Sc. in Project Management & Data Science (HTW Berlin) in October 2026.

PROFESSIONAL EXPERIENCE

08/2025 – present — **Masem Research Institute GmbH** – *Working Student, Data Scientist / Data Engineer*
Wiesbaden, Germany

- Converted unstructured business and financial content into validated, analysis-ready datasets by designing structured **information-extraction pipelines** with data-validation checks.
- Reduced manual processing time on recurring business tasks by building **AI-driven workflow automations** in n8n integrating LLMs and prompt engineering.
- Improved reliability of AI workflows ahead of production rollout by testing and validating LLM outputs end-to-end and resolving identified failure points.
- Improved consistency and maintainability of data pipelines by integrating APIs and configurable workflows using **Pydantic**-based configurations.
- Supported reproducible development in an agile team using **Docker**, **Git**, CI/CD workflows and Python unit tests; maintained ELK dashboards and KPI reporting frameworks.

08/2021 – 08/2024 — **Tata Consultancy Services (TCS)** – *Data Analyst*
Pune, India

- Enabled data-driven decisions for **20+ stakeholders** by developing and maintaining **10+ Power BI and Qlik Sense dashboards** on sales, revenue and operational KPIs.
- Built CXO-level executive dashboards comparing actual results with targets and prior periods, using **variance analysis** to turn performance changes into clear recommendations.
- Independently owned 2–3 business dashboards end-to-end, from underlying SQL to publication and stakeholder support.
- Reduced reporting preparation time by ~**20%** by automating the consolidation and transformation of data from SAP HANA, SQL databases and Excel using **SQL and Python**.
- Maintained **over 95% reporting accuracy** by implementing data-quality checks, reconciling reports against source data and standardizing reporting datasets.
- Improved SQL query performance by **up to 50%** by optimizing queries and validating data models.

EDUCATION

10/2024 – 10/2026 — **M.Sc. Project Management & Data Science** – Hochschule für Technik und Wirtschaft (HTW Berlin)
Thesis: LLM Model Cascade for Cost-Efficient Inference – evaluation framework benchmarking GPT-4.1, Gemini and cascade routing on 100 MMLU and GSM8K questions (estimated 59.82% cost reduction at 105.88% quality retention under oracle routing).

08/2017 – 08/2020 — **B.Sc. Mathematics & Statistics** – Savitribai Phule Pune University

SELECTED PROJECTS

SECOM Semiconductor Quality Prediction *Python, scikit-learn, XGBoost, SHAP*

- Prepared a high-dimensional, imbalanced manufacturing dataset using KNN imputation, Boruta feature selection and oversampling; built and tuned **Random Forest** and **XGBoost** classifiers with GridSearchCV to improve minority-class (defect) detection.
- Explained model behaviour and failure patterns with **SHAP** and Matplotlib, supporting cost-sensitive evaluation and model interpretability.

10/2024 – 01/2025 — **OBETA Warehousing Analytics** *Python, SQL, Power BI*

- Analyzed warehouse operations and inventory data and built Power BI KPI dashboards, delivering insights that contributed to a **15% reduction in excess inventory** through improved stock planning.

TECHNICAL SKILLS

Data & Statistics	SQL, Python, Pandas, statistical analysis, hypothesis testing (academic), A/B testing (project-level), EDA
Machine Learning	scikit-learn, XGBoost, Random Forest, feature selection, hyperparameter tuning, SHAP, model evaluation
BI & Visualization	Power BI, Tableau, Looker, Qlik Sense, Excel, Matplotlib, KPI reporting
Data Engineering	ETL, data modeling, data validation, SAP HANA, API integration, Pydantic; dbt and Snowflake (basic)
GenAI & Tooling	LLM evaluation, prompt engineering, OpenAI / Gemini APIs, LiteLLM, n8n, Docker, Git, CI/CD, Google Cloud

CERTIFICATIONS

Microsoft & IBM	Microsoft Certified: Power BI Data Analyst Associate (PL-300) · IBM Data Science · IBM Data Analyst
Google	Google Cloud Certified – Associate Cloud Engineer (ACE) · Google Project Management Certificate

LANGUAGES

English C1 – Proficient **German** B1 – Intermediate
